In the Williamsburg Tradition

We are pleased to present a distinguished cross-section of approved reproductions of the Williamsburg Restoration. Authentic copies of pieces now on view in Williamsburg, each is dignified in design with fine symmetrical lines that fully reflect the elegant simplicity of the Colonial Era.

As devotees of the Williamsburg tradition know, these reproductions embody a fashion as well as a craft revival, for all pegs and blocks, hand-wrought nails and pieces of hardware are so faithfully copied from the original that we have given to us in the 20th Century the love of the craft itself that existed in the 18th Century. Truly objects of unusual beauty and rare originality, the pieces pictured on the following pages have dignity, charm and wonderful grace, and, in your own home, will become your most cherished possessions.

Bachelor's Chest

A distinguished reproduction of an English mahogany chest of drawers, dating about 1740 — now also on display in the Governor's Palace. Its fine proportions and symmetrically graduated drawers mark it as a product of master craftsmen. Has such hidden construction features as hand dove-tailed rails of solid mahogany used between all drawers, solid pine dust panels to separate drawers and leg assembly consisting of 6 parts. All hardware is of hand-cast brass, hand-filed to same weight as original mounts. Because of its size it has come to be known as the "Bachelor's Chest." The top slide indicates its use as a dressing stand. Height 29 $\frac{3}{4}$ ", Width 30", Depth 17 $\frac{1}{2}$ ".

These quaint colonial decanters were originally designed for use in a cellarette. The liquor was poured off gently so as not to disturb the sediment in the decanters, the square design adding a picturesque touch.
